

CHEPURI BHARGAVI

Guntur · +91 9959819980 · chepuribhargavi2002@gmail.com · [LinkedIn](#)

PROFESSIONAL SUMMARY

Detail-oriented Software Engineering graduate specializing in Full-Stack Web Development. Proficient in building dynamic user interfaces using React / React.js, JavaScript (ES6+), HTML5, and CSS3/Bootstrap, alongside backend API development in Node.js and database management with SQL. Experienced in developing and integrating RESTful APIs, debugging software logic, and working in Agile team environments using Git. Eager to write clean, maintainable code for scalable web applications.

TECHNICAL SKILLS

- **Front-End Development:** React / React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Flexbox, Responsive Web Design
- **Back-End Development & APIs:** Node.js, RESTful API Design & Integration, JSON Processing
- **Databases & Data Tools:** SQL
- **Version Control & Tools:** Git, GitHub, VS Code

EXPERIENCE

IBM SkillsBuild (Edunet Foundation & APSCHE)

Remote

Front-End Development Intern

Jun 2023 – Jul 2023

- Collaborated in an active Agile sprint environment to translate functional requirements into responsive UI components using HTML5, CSS3, JavaScript, and Bootstrap.
- Participated in code reviews, testing, and component debugging to resolve edge cases and optimize frontend performance across varying screen sizes.
- Authored technical documentation detailing software debugging workflows and reusable component structures to facilitate team-wide collaboration.

PROJECTS

Wikipedia Search Application · React, JavaScript (ES6+), REST API, HTML5/CSS3, Bootstrap

- Engineered a dynamic full-stack search interface integrating the Wikipedia RESTful API via asynchronous Fetch calls to display live query results.
- Implemented robust client-side event handling, search query throttling, and error validation for seamless API interaction and improved performance.
- Designed an adaptable, mobile-first responsive layout utilizing Flexbox and Bootstrap grid, ensuring high usability across devices.

Employee Management System · Python, SQL, OOP Principles

- Developed a modular backend console application applying Object-Oriented Programming (OOP) to execute structured CRUD operations on employee databases.
- Architected efficient indexing logic using functions, dictionaries, and conditional algorithms to enable rapid record lookup by ID and key attributes.

EDUCATION

Vignan's Nirula Institute of Technology and Science for Women, Guntur

Aug 2020 – Jun 2024

Bachelor of Technology in Electronics and Communication Engineering

Grade: 7 CGPA

CERTIFICATIONS

- **Back-End & Databases:** Node.js Programming, Introduction to Databases – SQL
- **Front-End Web Development:** Build Your Own Dynamic Web Application (JavaScript), Build Your Own Responsive Website (Bootstrap, Flexbox), Build Your Own Static Website
- **Programming Foundations:** Python (Basic) – HackerRank Certified, Programming Foundations with Python
